TO OUR SUBSCRIBERS

The Edmonton Capital appreciates the many messages of commendation that are sent to the publishers daily, but if the senders wished to do a REAL SERVICE to The Capital they will send us the names of a few of their friends whom they think should read the paper regularly. The publishers will gladly send a sample copy free. If better still, send the publishers one dollar, and they will send the paper by mail for five months.

EDMONTON CAPITAL

SECOND SECTION — EDMONTON, SATURDAY, JULY 11, 1914. — SECOND SECTION

PAPER THAT APPEALS

The aim and purpose of the Edmonton Capital is to attain the highest standard in journalism. To publish a paper that will reflect the character of the better class of 125 readers. To issue a paper that will be fresh and breezy—that will be alive and up-to-date in its news, editorials, advertising and general make-up. A paper that will be an ideal one for YOUR HOME, and the home of your friends.

THEATERS, PLAYERS AND PICTURE HOUSES

COMBINATION OF ALL-STARS AT THE PANTAGES THEATER

Singing, Dancing and Music Will Combine to Please Audience.

THE FAIR CO-EDS AS HEADLINERS

Schiller String Quartette Will Be Stellar Attraction in Music Line.

Singing, dancing, music, comical fumbling, and mirth! Surely such a combination of abilities should please any audience and Pantages theater patrons will have the opportunity next week of seeing such an all star combination. From the view of variety nothing more could be desired and the reputation that each act has made for itself leaves no doubt as to the stellar quality of the show. Another of Menlo Moore's production head lines the bill and those who were in Edmonton last year remember that in his "Summer Girls" he gave to the audiences a musical playlet that was above the ordinary type of which we see too much of on the vaudeville stage today. This year he brings a sparkling original musical sketch entitled the "Fair Co-Eds." The curtain rises on the veranda of a Sorority House at the Chicago university and then the scenery changes to the campus and at last to a beautiful night scene in front of the gymnasium. The stages effects are superb and promise to be the most beautiful scenic production that has come to Edmonton for some time. The girls in the cast are all pretty petite misses and can both dance and sing with a charm that makes one forget the hot, sultry weather. The story is a good rollicking comedy and we have Kitty the belle of the college trying to evade the handsome Paul Beresford, with Dora's sister, Peg, who loves poetry, continually butting into interesting situations. One of the most interesting characters in the cast is Archibald Beadsley, who is the college grind and on the road he has scored a hit as the young man who is always studying with time for nothing else. The musical score is made up of five pieces and each is one of those tunes that you will start whistling several days afterwards because it is catchy. Altogether it promises to be a real treat. The music on the bill will be supplied by the Schiller String Quintette and it promises to be real music too. The Schillers come to Edmonton with a selection of chamber and popular music which is sure to please the music loving patrons of Pantages theater. Each members of the troupe is a musician of some note and it is but likely they will fall short of their reputation. When it comes to dancing just keep your eye on Chase and La Tour. Chase and La Tour have been creating a hit on their account for the last two years with their whirlwind dancing and they come to Pantages with the latest dances gathered from all over. With this ability they blend some pretty singing and as both of them have good voices the combination is practically unbeatable. Part of the fun on the bill will be supplied by Heras and Preston, the fast and funny tumblers. The two American lads made their reputation in Portugal when they performed before King Manuel during the famous carnival several years ago and since that time they have been cleaning up everything in sight. Usually tumbling is pretty dry diet unless their is some liquid refreshment mixed with it but the duo mix enough comedy into their act to make it very palatable.

The added attraction are the three well known masters of mirth, Kitner, Reeves and Montgomery. Possibly to Edmontonians the trio is not known but throughout the big circuits in the Eastern States the mere mention of their names brings back sweet memories. The trio have made an enviable reputation as comedians and singers and they will be seen in a singing dancing and talking sketch entitled "Swells at Sea." The usual interesting Pantageescope will conclude the performance.

:: Some of the Features at the Pantages Theater the Coming Week ::

TO GET WORK FOR SCHOOL GRADUATES

Kansas City, Mo., July 11.—An employment bureau for high school graduates to be put into operation by the local board of education immediately. The bureau has been running on a small scale for several months and more than fifty graduates have found employment through the board.

HERE'S A TOWN THAT DOESN'T OWE A CENT

Sterling, Col., July 11.—Sterling is perhaps unique among cities of Colorado in that it is entirely free from debt.

Three years ago, when the present administration assumed office, warrants were more than one year behind.

Canada's 1913 fisheries netted $33,485,000.

EMPRESS SOON TO EXHIBIT BIG FEATURE FILMS

Contract Just Closed for Many Five or Six Reel Attractions.

LONG FILM PICTURES NOW ALL THE RAGE

Public Like Feature Stories That Run for Almost An Hour.

In view of the fact that feature films appear to be the most popular since motion pictures have become all the rage, every motion picture manager of any importance is making every effort to secure the most striking four, five and six reel attraction on the market.

When motion pictures were first presented to the public it was an exceedingly fortunate manager who could secure 2,000 feet of film dealing with one subject. Now-a-days, however, it is a rare manager who does not exploit at least three subjects weekly that require four, five or six reels of 1,000 feet each. In fact, the devotees of the movies insist that on every program there must be a big "feature," a film that tells a big story at great length and arranged to run from 50 to 75 minutes.

No better indication of the progressive spirit of the local Empress theater management can be found than the fact that feature films have been secured for Empress patrons that will not be seen in any other motion picture theater in Alberta. The management at great cost has contracted for a series of feature films that will be sent direct from the factories in New York to Edmonton, shown here and returned immediately to the factories. All of this material will be first-class in every respect and will give motion picture devotees a new line on the enormous development of the movie industry.

It was not long ago that a feature film like "Quo Vadis" was considered a marvel of ingenuity and a big undertaking when presented in six reels, but even this epoch-making film pales to insignificance before the wonderful array of five, six and seven reel subjects that have been released recently and many of them will be shown at the Empress theater under the "exclusive service" contract which the Theater Beautiful management has just closed.

Signora Eleanora Duse is trying to found in Rome a theater which shall, in addition, be a home for the players. "My dream," the great actress says, "is a theatrical home center, where future interpreters of a drama or poem for their task can find a home that should be a constant source of artistic inspiration. The young actresses should have a serene and simple retreat, a 'theater home,' with daily gatherings in a room with beautiful books, a flower here and there, a piano, where the poet or musician will come from time to time and give expression to his fancies before the acolytes will have the right to share in what they have created—to live in the midst of its youth, proud to have surrounded them with light and purity and eager to inspire in them the finer ambitions of life and art".

CAPTAIN DUTCH RECARDO

City editors, fiction and otherwise, have a habit of saying that there is a good story in every human being who walks this earth. And, carrying the thought a bit further, it's about true that there's a good story in every animal, too—if we could only learn it. Such is the case with Bon, the plump hippopotamus with the Sells-Floto Circus and Buffalo Bill (himself), which is to visit this city Wednesday and Thursday, July 22 and 23.

Of course, today Bon is older and more accustomed to life than it was in its babyhood days, when it was brought from the Nile to form a part of the Sells-Floto menagerie. It was then that the story happened, for, far from the river of its birth, far from its amphibian companions, closed in a tank in a gilded wagon, Bon mourned for the land it had been brought from, moaned and wailed and refused to be comforted.

Those about the circus believed it ill. Medicines came forth, medicines for colic, for cold, for climatic troubles—but none of them aided. The circus men watched the great, hulky animal. They sought their animal lore for remedies, but failed. Several thousand dollars was daily traveling toward nothingness, without, it seems, a chance for salvation. Then came the remedy, in one of the seat men of the circus.

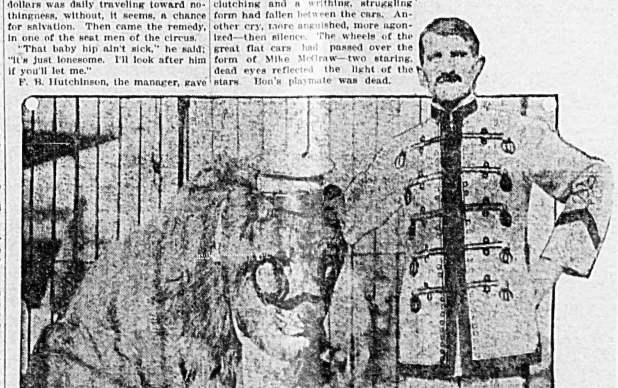
"That baby hip ain't sick," he said; "it's just lonesome. I'll look after him if you'll let me."

F. B. Hutchinson, the manager, gave his consent and that day the boy took charge of the beast. He went into its cage, he spoke to it, he coddled it and remained with it. He became its companion, nor did he leave it when night came. A pile of straw at the far end of the cage formed his bed. He had become the hippo's playmate.

And the illness left the great, hulky animal from the River Nile. Bon grew suddenly content. His great, hideous jaws yawning, he would eye his companion and paddle about his tank, wailing no more, fretting no more—except when Mike McGraw left the cage for his meals. Then came the tragedy.

One night the circus train was grinding along on its twenty-mile-an-hour journey over the Oregon plains to reach a distant town at dawn. A spark from the engine. A waiting pile of canvas on top of the hippopotamus cage and the swirl of flames. Mike McGraw leaped from his bed of straw. He seized a bucket of water from the tank and opened the cage door. Hurriedly he sought the top of the wagon and threw the water on the fire. Then he started to descend again.

A lurch from the train. A misplaced step. A scream of terror—a sudden clutching and a writhing, struggling form had fallen between the cars. Another cry, more anguished, more agonized—then silence. The wheels of the great flat cars had passed over the form of Mike McGraw—two staring, dead eyes reflected the light of the stars. Bon's playmate was dead.



Lion tamer with the Sells-Floto circus here July 22-23.

And that is why, every now and then, Alapaw, the head animal man, looks sharply at Bon and then turns to one of his assistants.

"I guess we'll have to put somebody in the cage with Bon," he will say; "he's grieving again."

So you see, animals have their stories, their passions, their griefs, as well as humans. But they are not as accessible as the stories of humans—that is all.

When the Sells-Floto-Buffalo Bill Circus comes here, Bon will be exhibited in the menagerie, both before and after the main performance. And when the parade goes through the streets at 10.30 o'clock the morning of the performance, with all the forty clowns grimacing, with the nine bands playing and the Vocalina and the Serenadum doing their best, and with Buffalo Bill, America's best beloved citizen, leading the great two-mile-long procession, the cage of Bon will be open to view, as well as that of all the other animals.

The Sells-Floto-Buffalo Bill circus is greatly increased this year—increased in everything except price. That remains the same as ever, 25 cents.

SOCIETY WOMAN BUYS 500 CIGARETS WEEKLY

Philadelphia, July 11.—From a tobacco dealer comes the astonishing information that the little city of Chester, Pa., leads the country in proportion of its population in its number of women who while away the time with cigarets.

The dealer said he had a list of no fewer than 3,500 women customers. At least 100 women stop in his store daily to buy cigarets. To a society woman who entertains he supplies 500 cigarets a week. For personal use, the average woman smoker orders 100 cigarets at a time and consumes them at a rate of ten a day.

MAYOR SAVES CHILD'S DOG FROM POND

Albany, Ore., July 11.—Because the poundmaster took her little dog, seven-year-old Pearl Bradley tearfully appealed to Mayor Curl, with the result that the mayor paid the fine of $5, after he had failed to get action from the council. The mayor does not question the propriety of the dog catcher's action, but is of the opinion that he acted unreasonably. The little girl offered him all the money she had before going to the mayor, "but it wasn't enough," she said.

Argentina is shipping grapes to England.

BETTER LIFE BELTS NOW ARE DEMANDED

London, July 11.—Following the Empress of Ireland disaster and the statement that floating masses were discovered in the water "which on examination proved to be people with heads drooping beneath the surface, hanging limply in lifebelts," the Board of Trade is seriously considering a proposal to approve only of life-jackets which automatically turn the persons encased on their backs and prevent their heads from falling into the water. Such jackets would prevent the drowning of persons through fainting in the water, which is believed to have been a frequent cause of loss of life.

DREAMLAND WILL OFFER GRIPPING, EXCITING STORY

The Riders of Petersham is Feature in Vitagraph Photoplay.

STORY OF YOUNG HEIR'S FIGHT FOR HIS RIGHTS

Film Will Be Shown Monday and Tuesday in Jasper East Playhouse.

Coming to the Dreamland theater for Monday and Tuesday is the vitagraph photoplay masterpiece, "The Riders of Petersham," in three parts. It is a gripping and exciting story of a young heir who foils his dishonest guardian's villainous plot to rob him of his inheritance. The disclosures made by an intrepid editor, bring about situations that are astounding. After many thrilling encounters the desperate "Night Riders" are overcome and right triumphs over might.

Richard arrives at Petersham to claim his inheritance papers from his guardian and uncle, J. B. Coke, Petersham's leading citizen. He meets Emily Burnay and learns that her father, the editor of the local paper, has many enemies on account of declaring that some of Petersham's prominent residents run an illicit still in the Hills. Coke has confiscated Richard's securities and desperately plans to conceal the fact. Richard and Burnay became friends and when the editor is warned to beware of the "Night Riders" Richard decides to stand by his friend. One night Coke steals a box supposed to contain Richard's securities. Richard stabs at him, misses him and cuts off a piece of Coke's sleeve. Coke escapes and Richard goes downstairs, awakens his uncle, who is feigning sleep, and tells him of the occurrence.

Burnay is again warned by the "Night Riders." Emily and Richard, now lovers, gain the everlasting gratitude of Job Trainor, the village blacksmith, by caring for his little daughter when she is injured. The "Night Riders" capture Elmer, the editor's son and he recognizes among them a well-known citizen. They bind him and set him adrift on a raft. Richard discovers the boy's plight and rescues him. Bringing him to Burnay's office, Richard finds the "Riders" have left a note threatening to burn the place if another edition of the paper is published. Burnay declares his intention of getting out the next one in spite of their threats.

The edition is printed and Richard distributes it. Emily asks Job's assistance and he gets together several friends, all fully armed, bringing them to Burnay's house at night. The "Night Riders" masked in long hoods and led by Coke, ride up and demand that Burnay give up his press. On being refused they start to fire the building. Burnay and his men then rush out and after a terrific fight, drives the "Riders" into full retreat. Coke and Richard grapple. The former's mask is torn off and he is about to shoot the astonished Richard when Job grasps his wrists. Later, Richard finds his uncle packing up the dagger-ripped coat. Coke then confesses, and telling Richard the estate is now his, departs forever. Richard, tired out, sinks in a chair and dreams of what we all naturally anticipated; his happy marriage to Emily.

ACTORS FORSAKE STAGE TO JOIN MOTION PICTURES

Many Who Have Been Seen on Edmonton Stage Now in Leading Role.

MANY ARE BETTER AS SILENT ACTORS

Bijou Has Featured Films in Which Were Locally Known People.

From time to time there appear on local motion picture screens the pictured presentments of players who are well known to Edmontonians, from their association with "legitimate" companies that have appeared at local play houses, chiefly the Empire and Lyceum. These are not confined to dramatic actors and actresses, but musical comedy favorites as well.

The passing show in motion picturedom at the Bijou theater during the last few months has revealed the fact that many of the Edmonton favorites are even better silent actors than they were exponents of the spoken drama. A few nights ago the lithesome figure of Wallace Beery floated across the screen at the Bijou. Mr. Beery will be recalled here as the heavy-voiced baritone who sang in support of Mrs. "Bob" Fitzsimmons when that lamented songstress appeared at the Empire theater as the star of "The Balkan Princess." At that time Mr. Beery was the "whole show," but he has evidently forsaken the "merry merry," and is now leading man for one of the movie concerns that deals only in comedy films. The brand is well known by Bijou patrons. Mr. Asher will be well remembered here as a member of the perennially popular Lewis and Lake musical comedy company, which played several engagements at the Lyceum, and on one or two occasions appeared before packed houses at the Empire. Mr. Asher is still a "Dutch" comedian, but motion pictures are evidently his forte for his methods are much better suited to the silent drama than his uproarious Teutonic dialect in musical comedy. In the former he is a big success.

Then there is little Rhea Mitchell, an ingenue of rare charm who played two stock engagements at the Empire theater with the famous Gus Forbes company, and later played with Sidney Ayres in a sketch entitled "A Call From the Wild" as an Orpheum vaudeville headliner. Miss Mitchell is winning new laurels with the Kay-Bee company, as is also Mr. Ayres, whose Apollo-like profile is admirably adapted to motion pictures.

Doris Fleming, who was one of the popular young women in the second row of a musical comedy chorus at the Lyceum three seasons ago, has become one of the principals with the Great Northern motion picture forces, and her salary has jumped up several figures since she appeared here last as a songstress-dancer. She was a prominent figure in one of the first of the "Adventures of a Free Lance" series, which have won many new friends for the Bijou.

Horace Tracy, who was seen here as one of the principal dancers with Raymond Hitchcock last season, has deserted musical comedy for a stellar position with the Majestic Picture company, and Catherine Harris, who was last seen here in support of John Mason in "As a Man Thinks," is a character woman with the Mutual forces.

There are others too numerous to mention who have floated across the Bijou screen at various times and who have unconsciously renewed acquaintances with Edmontonians who saw them when they might have considered motion pictures unworthy of their talents, but they have succumbed to the call of the lure as many other noteworthy actors and actresses have done.

One person who knows the actor's life thoroughly from the inside, and just now stands far enough removed to get a clear perspective, is James Montgomery. And what does he think of the younger generation of actors? This is what he said just a few days ago: "They are too trivial; they need to tend to business. Life with them is all chatter, chatter, chatter, most of it scandal. A man and a woman walk down the street together, and right away they are the subject for table gossip at the actors' clubs. I don't see many actors reading or studying to broaden their lives. What are we going to do when the good actors are gone?"

FAIRLY FAVORABLE TRADE INDICATIONS CANADIAN CENTERS

Crops Prospects in the Northwest Helping to Maintain Confidence

BRISK FALL BUSINESS IS BEING ANTICIPATED

Outlook Promising, and Marked Improvement Being Looked Forward to

New York, July 11.—Despatches to Dun's review from branches of R. G. Dun and company in leading trade centers of the Dominion of Canada indicate the prevalence of the usual midsummer quiet and that while at some points it may be slightly more pronounced than a year ago, indications, on the whole, are considered fairly favorable.

Montreal reports both wholesale and retail trade to be seasonably quiet, although the movement of hardware is normal and there is a fair distribution of groceries. Footwear manufacturers are operating with a reduced staff and there is only a moderate demand for dry goods, while the raw fur trade is extremely dull.

Marked improvement is noted at Quebec, liberal orders being received by wholesalers and retail trade is good.

While wholesale trade was not very active this week at Toronto the general feeling appears to be hopeful and confidence is expressed in the future. Dry goods, groceries and most other staples are in moderate request, but most buyers are awaiting more definite information regarding crops.

Hamilton reports business fair, but the factories not especially active, some of them working only part time.

Favorable crop prospects throughout the far west and northwest maintain confidence, and while there is not much activity at present a brisk fall trade is anticipated.

Local trade at Winnipeg is said as usual at this period and not much improvement is expected till after the harvest, but the outlook is promising and marked improvement is regarded as certain with the approach of fall.

The industrial exhibition at Calgary had a stimulating effect on business, but merchants generally are awaiting assurance of good crops before operating to any great extent. Favorable weather has helped the crops in the vicinity of Saskatoon and country merchants are ordering more freely. Gross earnings of the Canadian railroads so far reporting for June show a decrease of 14.8 per cent. as compared with the earnings of the same roads for the corresponding period a year ago.

Commercial failures in the Dominion of Canada this week number 38 as against 37 last week and 24 the same week last year.

REMARKABLE CURES ARE REPORTED AS EFFECTED AT SHRINE OF ST. ANNE

Quebec, July 11.—Three rather remarkable cures have been effected lately at the Shrine of Ste. Anne de Beaupre, it is claimed. Francois Xavior Doirion, of Rumford Falls, Maine, who had been ailing for some time past with tuberculosis of the right hip, was suddenly cured at the famous shrine on July 7.

It seems that he had been unable to walk without the aid of his crutches for the past two years, and had gone on a pilgrimage to Ste. Anne in the hope of being cured.

Mr. Doirion left his crutches in the church and walked out a perfectly well man.

Another cure on the same day was effected on Mrs. Peter Lalonde, of Ottawa. She had been lately ill with dyspepsia. This case, however, is not very certain and the parish priest of Ste. Anne is anxiously awaiting word from the woman.

The most remarkable case was that of Mrs. George Marlow, of Watertown, N. Y. She had been very ill with palsy for the last six years and had been condemned by several doctors, who stated that she would not be able to walk.

As a last resort she went on a pilgrimage to Ste. Anne and there she was cured of her wasting disease on the 24th of June. She left her crutch behind her in the church as evidence of her complete recovery.

During the past six weeks some 25 cures are said to have been effected at the famous shrine.

Formation of New Tennis Club

On Thursday night at a well attended meeting in the Technical school the formation of a tennis club for the use of the municipal tennis courts on Syndicate avenue was discussed. Mr. von Auerberg, Superintendent of Parks, was present and explained the City's attitude in the matter, and after considerable discussion it was decided to call a further meeting on Wednesday, July 15th, for the formation of an association composed of the various tennis clubs in the district served by these courts, the association to have the control of the play on the courts.

The City Parks Department will complete the construction work and supply the necessary nets and tapes and maintain the courts. The association will charge its members a small membership fee consisting of probably $1.00, and will make arrangements necessary with the parks' Department for use of the courts.

During the day time such arrangements will be made as will allow the use of the courts to all those wishing to play, it being the desire of the City authorities to have these courts used by the people as much as possible. It is highly desirable that there is a large turnout on Wednesday next to attend the meeting in the Technical School at 7.30 for the purpose of completing the organization of the association.

People desiring to play tennis who are not already members of some club in the vacinity are making arrangements to form a new club which will become part of the association. All churches, clubs and social clubs desiring to use the courts should have representatives present at the meeting and it is hoped that active play on the courts will be commenced by the end of the week.

Military Men Eliminated

Torreon, July 11.—The plan of Guadalupe, under which the present revolution has been operating was amended at the recent conference between Carranza and Villa representatives so as to prevent any military leader from becoming provisional president of Mexico, according to a lengthy official statement issued here by the delegates before adjourning the sessions.

This action would eliminate Carranza, Villa, Geneles or any of the leaders now in the field as presidential possibilities.

Two Girls Are Drowned

Sarnia, Ont., July 11.—Miss Nellie Beaumont, 17 years of age, and Jessie Lawson, 18 years of age, were drowned at Tashmoo park in the St. Clair river while bathing yesterday.

101ST REGIMENT ENTERTAINED AT GARLAND THEATER

Members of the 101st regiment to the number of 150, were the guests last night of the Garland theater, Jasper east, to a smoker, on the occasion of the first showing in this city of the famous four-part Kalem feature film, "A Celebrated Case," a splendid war picture and story of the early centuries in French and English wars. The acting in the piece is up to true Kalem standard, with Alice Joyce and Guy Coombs in leading roles. It would be impossible to enumerate all the fine points of the production, but words of praise are due to the correctness in detail of all the finer points of the picture, such as the military uniforms of both the French and English contingents in this historic battle.

The 101st regiment who were invited upon the instance of Geo. Hammond, the new manager of the Garland, marched to the theater, led by their regimental band. The added attractions, other than the feature film, were the Kennard Vaudeville Co., in a couple of specially clever skits, and Miss Marjory McGregor, in latest popular songs. Miss McGregor sang by request, "Where The River Shannon Flows."

S. Nankin, of Toronto, owner of the Garland, and George Hammond, the new manager, announced last night that this popular playhouse is about to undergo extensive renovations. The entrance and interior of the building will be completely redecorated in most attractive style, new seats will be put in, a new piano installed, and entirely new machines of the latest improvements will be set up, and upon the completion of these improvements, a full orchestra will be in attendance at all shows at the Garland, making this one of the most upto-date picture houses in the city.

FIGHTING JOE SAYS NOT DECIDED AS TO SEEKING SEAT HERE

London, July 11.—Joe Martin, who sails for Canada today, said last night: "I stand by liberal principles as I undertook at the time I was elected. The government has introduced a number of violations. Those principles of some of the liberal members are a disgrace to the nation. I know many of them who support the government only because they hope to obtain honors at some future time. They vote for their knighthood, or whatever they aspire to, not for their principles. That is as bad a corruption as taking money.

"I have not yet decided whether I shall seek election to the dominion parliament, but I have no present intention of returning to England again."

Miss Wright Elected

Halifax, July 11.—Miss Wright, of New Westminster, B. C., was elected president of the Canadian National association of Trained Nurses at yesterday's session of the convention here.

EASTERNERS STILL LOOK TO THE LAND

Even Alberta Oil Does Not Slacken Interest in Mixed Farming

WOLF TALKS WITH MANY

Crops are Better as One Comes West—Results Expected from Convention

"People from Edmonton who registered at hotels in Toronto and elsewhere during the eastern trip of the Edmonton Industrial association were literally besieged with enquiries about this city and district," stated August Wold, of the press exchange department, of the Industrial association this morning.

Mr. Wolf has returned home from what was not altogether a pleasure trip, as he was in touch at almost every stopping place with people who wanted to know about Edmonton and Alberta. He made a flying trip to Montreal, Boston, New York and other eastern cities after the advertising convention.

"Although the recent oil development," he said, "has created a great deal of interest all over the east and middle west, still the great thing is the land—the mixed farming opportunities. Everybody in the east seems to recognize that. Many, however, asked us about oil and not a few small manufacturers were on the alert as to chances for branching out or moving here.

"We distributed about 2,500 copies of the little booklet, 'A Few Facts About Edmonton,' also 10,000 little coin souvenirs. The publicity which we will get as a result of the advertising convention, of course, has hardly started yet. It's when they get away to their own cities, and the news of the convention gets into the trade papers that results will come.

"Then there were many who took the trip and after the convention went to their former homes or other cities or towns. At Port Perry, Ont., where I stayed, there were many who expressed their intention of coming here this fall.

"They expect a good crop in the east and middle west, and I would judge that they will get it, but there is no place I saw where the crops looked quite as good as they do in this part of Alberta. In fact, as we travelled west from Winnipeg we could notice a gradual change for the better."

Drowned When Boat Upsets

Courtwright, Ont., July 11.—George and William Mead, of St. Claire, were drowned yesterday afternoon when their duck boat overturned.

To keep a phonograph disk clean there has been invented a tiny broom to be so mounted to sweep away dust as the disk revolves.

DYSPEPSIA MADE MY LIFE MISERABLE

Did Not Think I Would Ever Be Able To Enjoy Another Meal, Until I Decided To Investigate Claims For "Fruit-a-tives"

W. F. ALLEN, ESQ.

Halifax, N. S. Nov. 22nd, 1913

"I feel that I would be doing "Fruit-a-tives" a great injustice if I did not make known to you the wonderful results that I have obtained from its use. For the past eight years, I have been afflicted with Dyspepsia. I had given up all hopes of ever being able to enjoy another meal, when I chanced to see your advertisement in the papers, and as a last resort, I decided to investigate and see if all you claimed for "Fruit-a-tives" was true. Now, after having used six boxes, I find that your claims for "Fruit-a-tives" are well founded. I am now in perfect health and can enjoy my meals as I formerly did, and I cannot praise "Fruit-a-tives" too strongly". WELLARD F. ALLEN.

Just as sure as day follows night, just so sure will "Fruit-a-tives cure every trace of Indigestion and Dyspepsia. "Fruit-a-tives" keeps the stomach sweet and clean. "Fruit-a-tives" insures the digestive juices being fresh and plentiful by ridding the whole system of impurities. "Fruit-a-tives stimulates the stomach muscles, and insures every meal being promptly and completely digested.

If you have any Stomach Trouble, such as Belching Gas, Pain After Eating, Sour Stomach, "Heart Burn"—and especially if your Bowels are not regular, by all means take "Fruit-a-tives".

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent on receipt of price by "Fruit-a-tives" Limited, Ottawa.

We Are Now Drilling

The Maritime Petroleum Co., Ltd.

FULLY PAID UP—NON-ASSESSABLE

For a Few Days Shares Will Be Sold at **25c** EACH
PAR VALUE ONE DOLLAR

Buy Your Shares Now—For when the drills penetrate a few feet further into the earth these shares will increase very rapidly.

FACTS—

Our properties are all on the anticline. Our properties are owned outright by the Company and we do not have to pay any rental to the Government.

We are not working on any leases granted by the Government which may be cancelled at any time if certain conditions are not complied with.

This is a point which should be seriously considered by every person investing in oil shares. On our properties are mud-volcanoes, which show the presence of Gas and Oil.

Vast asphalt deposits are in the near vicinity of our well. The drill is now at work and in a very short time we will know what the under-lying strata consists of.

WHAT—Investors May Be Sure Of:

1.—Every dollar received from the public for shares sold will be used for actual drilling, less the amount for cost of selling.

2.—Every person becoming a share holder will always have an interest in the Company and his shares can never be forfeited.

3.—The Company's areas or rights can never be forfeited as they are owned absolutely by the Company.

4.—That the directors of this Company are men of integrity and of well known business acumen and will give every share holder a square deal.

5.—We have an experienced driller and guarantee that none of the Company's money will be mis-spent.

CONSERVATION OF MOISTURE MEANS MUCH TO ALFALFA

Results of Experiments in Growing Premier Fodder Crop in Alberta.

SOWN IN DRILLS AND SUBSOILED DOES BEST

Crop is Worth Experiment Though Liable to Winter Killing in Some Parts.

Up to the present time the growing of alfalfa has been attended with some difficulty. Quite a number of farmers have sown small patches, but very few have had much success in getting a stand. An encouraging feature is, however, that some people have grown it successfully without irrigation, and while a favorable location and a soil particularly adapted may have contributed considerably to their success, yet it is evident that there are some well defined reasons which will account for a number of the failures, and if proper methods are employed the time is not far away when this crop will be grown successfully over a considerable portion of the province.

During the past few years officials of this department have given a good deal of time to investigating the growing of alfalfa, not only in this province, but in other provinces of the dominion, and elsewhere. It has been discovered that the methods which apply to alfalfa culture in eastern Canada, or in many parts of the United States, are not practicable in this province.

As soon as the demonstration farms were established the department commenced actual work with the growing of alfalfa. As there were six of these farms scattered over the province about 150 miles apart, a splendid opportunity was given to investigate how this crop would succeed in various parts. Since most of the demonstration farms were raw prairie when purchased, the first two years had to be spent in breaking and in a proper state of cultivation to sow.

At Medicine Hat during the year of 1911 about eighteen acres of alfalfa were sown broadcast after the land had been thoroughly prepared and inoculated. During the same year about one ton of hay per acre was cut. In 1912 and 1913 very little crop was harvested from this patch, apparently all the moisture had been sapped from the ground by the first crop. Early in July, 1913, this field was drilled with a common walking plow, and after about two months rows of fresh, healthy, green alfalfa came up along the center of each drill. It is intention to cultivate with a three-acre tivator between the drills during the coming summer.

In the season of 1912, about five acres of alfalfa were sown on each of three farms, namely at Medicine Hat, Vermilion, Sedgewick. The Sedgewick alfalfa winter killed entirely, and while the Medicine Hat and Vermilion alfalfa came through the winter, yet it could not be considered a good stand. Upon investigating further the department arrived at the conclusion that the only sure way of getting a stand was to sow the alfalfa in drills about 32 inches apart, and to cultivate with a horse cultivator throughout the growing season; consequently, last year most of the alfalfa sown on the demonstration farms was put in drills, using three pounds of seed per acre, and every field went into the winter in first class condition. On the Olds demonstration farm about five acres were sown broadcast on land which had been specially prepared. After being thoroughly summer fallowed the previous season and plowed about 10 inches deep, a heavy coat of well rotted manure was applied. This manure had previously been mixed with chaff time. The ground was well cultivated with scuffler and a field on which alfalfa had been grown, and about the middle of June Grimm alfalfa was sown at the rate of eight pounds per acre. This crop also went into the winter in a very healthy condition.

Experience leads us to believe that, on account of the hard nature of a great deal of the subsoil, the use of a sub-soil plough will be found of great advantage in loosening the under soil, so that the roots can penetrate easily. During the coming season it is the intention to sub-soil to a depth of 14 or 15 inches all land on which alfalfa is to be sown. By sowing in drills and cultivating between the rows it will be possible to keep down the weeds, and to conserve much moisture which would otherwise escape.

Very keen interest is being taken by many of the farmers throughout the province in the work which the department is doing with alfalfa, and while there are no striking results to report up to the present time, yet it is felt that the work done so far is sufficiently encouraging to warrant giving more effort to solving some of the problems connected with the growing of this crop.—Alberta department of Agriculture Bulletin.

The annual capacity of the forest nurseries of the United States government is about 25,000,000 young trees.

FEEDING OF DAIRY CATTLE.

The question of supplying the right kind of feed for the dairy cow at a minimum cost has occupied the minds of all good dairymen since dairying first became an industry. When it is considered that there are in Canada 2,594,179 dairy cows, and that the value of dairy products in 1913 amounted to $120,000,000.00, and that the average number of pounds of milk for each cow in 1900 was 2,850 pounds, and in 1910, 3,805, a gain of nearly 1,000 pounds, amounting to nearly $25,000,000.00, largely due to better feeding, some idea can then be formed of how important is the question of feeding the dairy cow.

There are two factors which largely control the economical production of milk. One is the adaptability of the cow used for the purpose, and the other the amount and kind of feed supplied.

The problem confronting the dairymen is to produce the largest amount of milk and butter at the least expense. Everyone knows the value of pasture grass for any kind of live stock, especially for the dairy cow, and the dairyman welcomes the warm spring days when their cows can enjoy this feed. They not only produce more milk, but also gain in flesh as well, and this goes to show that good pasture grass is almost a perfect food, a balanced feed or ration, and suggests what the dairymen ought to do—that is, to imitate summer conditions as far as possible throughout the year. These consist of—

1. An abundance of palatable food.
2. Succulent food.
3. A balanced ration.
4. Moderate temperature.
5. Comfortable surroundings.

The Pasture Problem

In this western country one of the problems is how to secure a supply of pasture grass. When prairie sod is broken up and a couple of crops of grain taken off, it is difficult to get a good catch of grass for pasture purposes in some parts of the Province. On the demonstration farms we are endeavoring to grow crops to take the place of and to supplement the native pasture. The plan adopted at the present time is to sow fall rye in the month of June. This serves for pasture from about August until it freezes up. In the spring this rye starts growing early, and is used for pasture again, until the time it begins to head, when it can be cut for green feed, or left to ripen. As soon as the ground is fit to cultivate in the spring some fall wheat sown on another piece of summer fallow, or a mixture of oats and fall wheat. If a sufficient number of acres is sown of these three grains at different times as indicated, a good supply of pasture should be had throughout the entire summer, and by having a couple of extra rolls of wire and a few fence posts the land sown for pasture can be fenced each year.

To secure the largest returns a cow should milk ten months in the year. She requires at least two months' rest at the end of each lactation period, to fit her for the next year's work. It is also very necessary to have this rest for the sake of the influence it will have on the young calf. A cow that is milked to within a few weeks of calving generally has a calf lacking in vitality, and if this practice is carried on from year to year its effect will soon be seen in a lessened vitality throughout the whole herd.

During these two months' rest the cows should be fed as liberally as when milking, and this means that cows should be well fed the entire year, introducing as far as possible summer conditions during the winter months.

Nutritive Values

According to chemical analysis all foods contain a certain amount of digestive dry matter, and this dry matter is composed of constituents called protein, carbohydrates and fat. Of the three, protein is the most expensive and most important, and there is generally enough of the other two in most feeds. Protein is the tissue-building, muscle forming food. It constitutes to a large extent the white of eggs, the lean in meat, and the casein in milk, and is generally between 3 per cent and 4 per cent of milk, so that it is important that the dairy cow be supplied with sufficient protein in her feed. To get the best results from a dairy cow she must be fed a certain proportion of these three feeds, and this is what is called a balanced ration. A balanced ration is the feed or combination of feeds furnishing the several nutrients in such proportion and amount as will properly, and without excess of any nutrient, nourish a given animal for 24 hours.

The ratio which exists in any given feeding stuff between the digestible crude protein and the digestible carbohydrates and fat is called the nutritive ratio.

Pasture grass has a nutritive ratio of one to five or thereabouts, that is to say, one part protein to five parts carbohydrates. Concentrates high in protein are very expensive, so that if a large amount of protein can be furnished in the rough feeds grown on the farm, it is going a long way to produce cheap milk during the winter months. This feed can be found among clovers, especially alfalfa. By feeding this with corn silage and roots which are succulent and palatable, and concentrates such as ground oats, bran and oil cake, and by keeping the cows in a good, warm, well lighted, well ventilated stable, summer conditions are being imitated as closely as possible.

But a great many will ask, "Can corn and alfalfa be grown in this province?" On the Sedgwick demonstration farm, situated about 100 miles east of Wetaskiwin, about nine acres of corn were grown the past year, from which a silo, 15 feet in diameter and 24 feet high, was filled. The ensilage in this silo is of excellent quality, and is greedily eaten by the stock. Good crops of corn were also grown on the Vermilion and Medicine Hat demonstration farms.

A Profitable Ration.

Alfalfa is only in the experimental stage in the greater part of this province as yet, but it will no doubt be grown extensively in the future. In the meantime, until this crop is grown successfully, green feed, prairie hay and tame hay can be used for rough feeds, and ground oats, oil cake and bran for concentrates—the oats and bran to be mixed in equal parts by weight, and from two to three pounds of oil cake for each cow per day. In determining the amount of concentrates to feed, the condition of the cow, the kind of rough feed being fed, and the quantity of milk the cow is giving must be taken into consideration. If the cows are thin in flesh a few pounds of barley may be added to the ration. But it is not advisable to feed barley for a couple of weeks before, and about the same length of time after freshening. In addition to this, roots should be fed to supply succulence, and they also tend to keep the cows in good healthy condition.

The dairy cows at the demonstration farm at Vermilion were fed this feed last year, and twenty-eight cows gave an average of 8,898 pounds each, which will compare very favorably with any of the good herds in Ontario.

No hard and fast rule can be laid down to feed dairy cows, or any other class of livestock, and all feeding rations and standards are only to be used as guides. The dairyman, after first getting all the information he possibly can, is called upon at all times to use his own judgment. But it is important that dairymen feed liberally; there is more in feed than breed, though breed is important, and a large percentage of our dairy cattle at the present time are underfed.—Alberta Department of Agriculture Bulletin.

STATE BANK STARTS EXTENSION LIBRARY FOR FARMER PATRONS

The old State Bank of Fremont, Mich., is working out a new idea in the Western Michigan development program. This bank is erecting a new building and one of the features is a room arranged for agricultural extension work. The room will be equipped with an agricultural library, and will be open during banking hours for the use of the patrons among the rural population. This is doubtless the first bank in the state to have an agricultural extension library.

PROVINCIAL VETERINARIAN IS KEPT BUSY

Dr. P. Talbot, provincial veterinarian, has now an office in the parliament buildings at Edmonton and is frequently sought out by farmers from all over the province wanting advice on problems which they encounter. Dr. Talbot has made a number of investigations into ailments affecting live stock in various parts of the province and is kept very busy in this connection.

Dr. Talbot is making a collection of water hemlock, loco weed and other plants which injuriously affect horses and cattle and is preparing information on their effects.

With a rolling coulter you can often save the plow from injury. If you set the coulter so that it will cut about half an inch deeper than the point of the plow and about one-quarter to three-quarters of an inch outside the landside of the plow, if stones are present in the ground the coulter will hit them first, roll over them, and in doing so, raise the plow point above the obstruction.

Did you ever try oiling the ends of the whiffletrees with common machine oil to keep them from shrinking in the hot weather? Oil applied to any wood will tend to keep it from shrinking and swelling with the weather.

Find out too if the bearing of the shaft which drives the crank disk is worn, so that there is quite a little play. If there is, put in a new bearing before the shaft has a chance to become worn out of shape by travelling in a slack box.

Have you an implement shed on the farm yet? Just figure out whether it is cheaper to buy a new implement every three or four years or to put up a good shed, which will keep all your implements in good shape for three times as long, besides affording a good handy place for a bench, tool and forge shop.

One of the chief requirements of trees which are to be planted out is that the ground in which they are to be placed shall be in good tilth and contain a plentiful supply of moisture. Hence the land requires a large amount of working in preparation for trees.

Keep your plowshares sharp.

Constipation

is an enemy within the camp. It will undermine the strongest constitution and ruin the most vigorous health. It leads to indigestion, biliousness, impure blood, bad complexion, sick headaches, and is one of the most frequent causes of appendicitis. To neglect its slow suicide. Dr. Morse's Indian Root Pills positively cure Constipation. They are entirely vegetable in composition and do not sicken, weaken or gripe. Preserve your health by taking

Dr. Morse's 48 Indian Root Pills

DOCTOR-FARMER MAKES SUCCESS STOCK BREEDING

Twenty-two Years in Medical Profession, Becomes Thriving Dairyman.

HAS FORTY HEAD PURE BRED HOLSTEIN CATTLE

Bought Pontiac Korndyke Blood Before Famous Sire Had Made Name.

Near the town of Oshawa is to be found a man who is doing an invaluable service to the country in raising the profession of agriculture to a still higher plane than it now occupies. He is one of a noted family, his grandfather having been the first white man to settle between Toronto and Kingston. Ten years ago, Dr. A. A. Farewell was a successful medical practitioner; today he is one of the best known of Ontario's pure-bred live stock men. A reporter, on a recent visit to his dairy farm found the genial medico-farmer superintending the cultivation of a field of corn. While he talked willingly and entertainingly about outlines and dairy records he would say little about himself, and only by great diligence that the newspaperman enabled to secure the facts.

"I practiced medicine for 22 years," said Dr. Farewell at length, "the latter 12 years in British Columbia. Owing to poor health I decided to leave medicine, and so came back to Ontario, to the old homestead, where we now are. That's how I came to be on the farm, and, I assure you, I don't regret making the change."

Pontiac Korndyke.

For some years previous to Dr. Farewells' return the farm near Oshawa had been rented, and was not in the best of shape. The new tenant at once started dairying, with a fair-sized herd of grade Holsteins. After a few years' work with this herd he decided that the growing importance of the live stock industry in Ontario was such as to justify the importation of pure-bred stock.

He went to the United States, and spent some time going around to the big farms there." Dr. Farewell told me in response to queries. "I fully debated the matter in the whole matter, and finally settled upon a choice. I bought six daughters of Pontiac Korndyke, then a promising young sire. He had not then made his great record, and I got the six females for about $300 each. Shortly afterward, when his fame began to grow, I was offered $1,500 for one animal for which I had paid only $350."

Sticks to Pure Breds.

Dr. Farewell is primarily a pure-breeder; secondarily, a dairyman. He is not sorry that he rid himself of grade cattle and replaced them with registered stock. After five years' work with the latter he would on no account farm with scrubs. He has tried to improve his herd by every means at his disposal—by importation and by selection. As he himself said: "I have never sold one heifer calf since I started the work; but in the last three years alone I have sold over $3,000 worth of young sires. These go before they are fit for service. I am unable, it seems, to keep them for myself. Sorry I started pure-breeding? I would be mighty sorry now if I had not done so."

At the present time the doctor has 40 head of pure bred Holsteins, all from well known stock.

The farm has many up-to-date improvements, including a complete electrical equipment. Barns and barnyard are well lighted and power is supplied for a dozen purposes. Running water is piped from a spring a quarter of a mile away, and is on tap in the houses of the doctor-farmer and of his hired men, and also keeps the drinking vessels in front of the cows constantly replenished.

Contented Hired Men.

For the farm help five houses are provided, each with its own piece of ground for garden use. The men are hired by the year and live with their families in these houses. "I seem to have no trouble getting men for farm work," said Dr. Farewell. "That fact, however, I do not allow to justify any decrease in wages. The men follow certain rules and are satisfied. All hands go to work at 7 o'clock, but all the day's work is over at 6—milking done, and the milk separated and put away for the night. We manage this by adhering strictly to the rule that milking shall commence at half-past four every day in the year. On Saturday, work quits at 5 o'clock. If the men want a horse and buggy to go to town, they are free to go to the stable and help themselves. Treat your employees as you would be treated and you will have no trouble."

Sour Stomach

Sour stomach, sinking pains in the stomach and stunted growth tried to get even with Mrs. Wm. Hall, Ottawa, but Parmelee's Vegetable Pills were too much for them. They relieve constipation without fail. They tone the whole system.

Parmelee's VEGETABLE Pills

BLOW ON HEAD RESTORES HEARING

Juneau, Alaska, July 11.—Joe Ryan, employed in the stamp mill of the Alaska-Juneau Company, was almost miraculously cured of deafness. While working under a revolving shaft, a piece of the machinery struck him in the back of the head, knocking him unconscious. When he recovered he was temporarily dazed, but within a few moments realized that his hearing was restored.

CUTWORM HINTS

Cutworms are very injurious this spring. Reports of their destructiveness have come in from various quarters. It has been found that poisoned bait made of bran mash, sweetened with cheap sugar or molasses, and made decidedly green with a liberal application of Paris green, to be a very good remedy in the garden. A tablespoonful of this should be put at frequent intervals among the plants subject to attacks, not, however, nearer than 12 inches to the plant; for in case of rain, the Paris green might be washed against the roots and would injure or kill the plants. Thorough cultivation is an aid. Pieces of shingle or board placed at intervals over the garden, serve as traps under which the cutworms hide toward morning, and where they can be found and killed. Frequently the depredators will be found within an inch or so of the plant ... buried an inch under the soil. Young plants, like cabbage, cauliflower etc., when first set out in the small garden, should be protected by paper or tin, or a barrier of some sort, which should extend into the ground an inch or so, and two or three inches above the surface. This can be removed when the plant becomes tough enough not to invite attack from the cutworm. On large acreages, fall plowing and thorough cultivation is perhaps the most practical treatment.

SURPLUS $6,711 ON OPERATION OF GOVERNM'T FARMS

Six Farms Were Revenue Producing During Year 1913; Results Shown.

ATHABASCA PLANT WAS NOT WORKING

Dairy Cows Are Big Factor in Swelling the Revenue; $26,201 Received

The following statement of the operation of the demonstration farms for the year 1913, issued by the Alberta department of Agriculture, indicates the results for twelve months' operation. The cash receipts show pretty clearly the value of the dairy cow to the Alberta farmer as a source of revenue from month to month. Considering the difficulties of government farming and that this is really only the second year of operation, the results may be considered very satisfactory. It will be noted that the operating expenses include the value of feed purchased for the feeding of beef steers, and in fact the entire expenditure, not only for work, but for outlay of every kind in connection with a year's operation of the seven farms. No revenue was received last year from the Athabasca farm.

Farms are in operation at Claresholm, Vermilion, Olds, Medicine Hat, Sedgewick and Stony Plain.

It will be seen that there was a surplus of receipts over expenditure amounting to $6,711.26.

The details are as follows:

Credit

Revenue:	
Dairy	$26,201.59
Roots and Vegetables	73.61
Wheat	2,406.04
Oats	221.45
Barley	663.80

FARMERS AT MILNER, B. C. START TESTING COWS SYSTEMATICALLY

A cow-testing association has been formed at Milner, B.C. The principal aim of the organization will be to see that each member will have his herd tested and premises put in sanitary condition; the organization then intends to arrange a standard milk scale. Should any member have a grievance the district official appointed by the organization will make the test. These tests will be made at the farm, also the milk will be tested on the cars, and upon their arrival in the city, to assure of no adulteration.

HAY TIME COMING

Haying time will soon be here. Are the mower knives good and sharp? It is well to have a couple of good files handy so that a good edge can be readily put on the knife blades.

Are the ledger plates on the cutting bar of the mower worn? If they are new ones can usually be obtained and when put in will make a great difference to the draft of the machine, as well as to the job done by it.

Take a piece of wire some wet day or odd afternoon and clean out all the oil holes, and pour some oil in each when cleaned out.

Is there any play in the head end or knife end of the pitman rod? If there is, try to take it up, either with leather at the head end, or by tightening up the nut at the knife end. It will pay to look after play at this part.

GOTHAM PLANS A PENALTY FOR RECREANT HUSBANDS

New York, July 8th.-Father Knickerbocker is planning to make things unpleasant for family deserters. No more will there be leniency in the treatment of this all perplexing problem of the runaway spouse. Family deserters are going to have the bright searchlight of publicity turned full on them.

Without cost to themselves, but at some expense to the city, their pictures are to be reproduced in the press, together with detailed descriptions and copies of this "gallery of missing husbands" will be sent all over the United States in the search for the deserting husbands.

An appropriation has been made by the city with which to begin experimenting with the publicity plan. At the present time there are about 7,000 abandoned children in child-caring institutions, for whose support the city is paying approximately $800,000 per annum. In addition, in many instances, institutions receiving the allowance granted by the city and thousands of abandoned children are maintained in their mothers' homes by and at the expense of private relief agencies.

All told, it is estimated that $1,000,000 is annually expended in the care of children who are abandoned by the parent. It is estimated that the publicity given will have a circulation of over 500,000 an edition.

It is believed the plan will prove effective and will result both in reducing the number of cases of family abandonment and in effecting a substantial saving to the city, the taxpayers and the private relief societies.

SWALLOWS STINGING BEE; MAN MAY DIE

Boulder, Cal., July 11.—While endeavoring to gather in a swarm of bees, John Andrews, an aged farmer living a few miles east of here, was badly injured when one of the insects flew into his throat, stinging its way downward into his stomach.

Andrews was unable to control the muscles of his throat on account of the severe pains, and assisted the bee's ingress by swallowing it. The man's physician says the patient is suffering acute pain and may die from blood poisoning.

Cramp in Chickens.

When cramp is found in chickens it must be regarded as an indication of imperfect circulation of the blood in the legs and feet; or, in other words, the blood gets chilled as it passes through the legs and feet. If the cramp is not checked the toes refuse to do their proper work and become doubled under their feet. When the birds get to this stage they soon begin to look rough in plumage, which denotes that the cramp has got upstairs into the body and in bad cases the birds are quite unable to walk.

German universities had 59,602 students last winter.

U.S. DEPARTMENT OF AGRICULTURE TACKLES PROBLEM

To Meet Need of Farmers for Fodder Crops That Do Not Kill Out.

EXPERIMENT STATION STARTED IN S. DAKOTA

350 Varieties of Alfalfa Being Tried; Also Sorghums and Millets.

The United States Department of Agriculture has just begun the work of meeting the need of the great Northwest section for forage crops that will resist drought and that will not "winter kill."

The department has established an experiment station near Redfield, Spink County, South Dakota, and there experiments are being made that are of the utmost importance to all farmers of the Northwest and the drier sections of the central West. Samuel Garver is in charge of this station at which the interesting and important experiments are being made with millets, sorghums and alfalfas.

There are fifty acres and they are divided into plots of one-twentieth of an acre each. Here Mr. Garver has sown 350 varieties of alfalfa. The average farmer, and not a few experts, may smile a doubting smile, but there are 350 varieties. Of course, one variety may differ but very little from another, but still there is a difference and this difference may play an important part in crossing the varieties.

Some of the alfalfa patches are planted in cultivated rows, thirty-six inches apart. Some of the seed is drilled in at various distances apart.

A good deal of the land has been plowed eight inches deep and double disked. Every plot has a duplicate, so that the results may be checked accurately.

This new station does not set itself up as an ideal alfalfa farm or to show the best ways of sowing, cultivating and cutting alfalfa. Its one object is to cross the varieties so as to produce other varieties that will withstand the most severe drought and that will not be winter killed by the most bitter weather. This is the great need of the Northwest and Central West—forage crops that will withstand long periods in which there is no rain and that will survive the blizzards of the plains. In fact, this is the one entific work, with the sole idea of of the Northwest, and the government has set out to help him solve it.

Besides alfalfa, experiments are being made with kaffir corn and with koaliang, the new variety of grain sorghum that was recently imported from Manchuria. That valuable results will reward the efforts of the director in charge and the Department of Agriculture there can be little doubt. Seasonrainfall this summer and the whole meeting conditions as they exist, is bound to meet with some success.

The Northwest has had plenty of rainfall this Summer and the whole country is on an alfalfa boom. The people are no, only talking alfalfa, but they are sowing it. They are discussing the different varieties with as much animation as the fans show in proving the prowess of their favorite ball players. Interest in the new government station is keen, because the farmers know what its success means to them.

LEWIS QUITS COLLEGE TO RUN FOR GOVERNOR

Philadelphia, July 11.—William Draper Lewis has resigned as dean of the law school at the University of Pennsylvania and William E. Mikell, formerly professor of criminal law, has been appointed to succeed him. Lewis will run as the Washington Party Progressive, candidate for Governor.

Be careful about winding clocks. Wind them always at the same time and never wind them too tight. Find out just how many full turns of the key it takes to wind the clock to the proper point, and always stop with that number of turns.

MANY INDUSTRIES IN OPERATION ON EDMONTON SITES

Commissioner Harrison Compiles Statistics Showing 125 Manufactories Here.

INCLUDE LINES FROM BREAD TO BRASSWORK

Map Showing Location of Concerns to Form Portion of Exhibit at Calgary

There are 125 manufacturing industries, embracing 44 lines, according to a compilation just completed by Commissioner Harrison. On a huge map hanging on the wall of the commissioner's office appear the different industries and the location of each. This map, together with several sets of civic plans and statistics relative to Edmonton and city planning was to the Alberta Town Planning and Housing association's convention in Calgary June 16-18.

The list of industries as compiled by Commissioner Harrison is as follows: Aerated water, etc., 3; boxes, etc., 2; brass foundary, 1; bread and cakes, 6; brewers and malters, 2; bricks, 6; cigars, 4; clothing, 2; concrete blocks, etc., 2; confectionery, 2; creamery, 3; excelsior, 1; foundry and machine shop, 6; gravel, 1; harness and saddlery, 2; ice, 3; jewelers, 6; mattresses, 3; millers, 4; glass, 1; packing plants, 4; photo engravers, 2; plaster ornaments, 1; printers and publishers, 15; rubber stamps, 1; sashes, doors, etc., 10; shoes, 1; saw mills, 3; sheet metal works, etc., 4; stone works, 3; street paving, 1; tanneries, 2; vinegar, 2; plating, 1; boats, motor, etc. 4; furriers, 1; maps, 2; lenses and eyeglasses, 1; auto works, 2; cabinet makers, 1; paper boxes, 1; fence and wire works, 1.

Commissioner Harrison has written the managers of the various concerns asking information concerning the number of employees and the exact amount of the weekly payrolls.

Edmonton is growing rapidly and the increase in manufacturing industries is a source of gratification to those interested in the city's growth. The various development committees that have been active in the city's behalf are largely responsible for this satisfactory state of affairs and those men are to be heartily commended.

ESKIMOS LOST TO MOOSE JAW

SPORTS

Edited by Cliff Dunham.

Sport Phone 1166.

ESKIMOS BOOTED THEIR GAME AWAY WITH MILLERS—SCORE 7-1

Half a Dozen Bush League Errors Show the Edmonton Team up Badly—Crum Relieved Chapman in pitching and Did Very Well—Umpire Colgate Absent—Mackin Will Substitute.

Moose Jaw, July 11.—In the wildest exhibiton of ball seen here in many moons, the Millers grabbed the opening game of the series from Deacon White and his Eskimos by 7 to 1. It was a fierce exhibition, the visitors booting the pill badly and bunching their boots so that the Millers had a lead pipe cinch getting a big lead.

Umpire Colgate was absent and will leave for Chicago today, where Mrs. Colgate lies ill with typhoid fever. Mackin will probably work until his return and is expected from Medicine Hat today. In the absence of Colgate, Gregg and Seaton handled the game and it did not look the same without a regular umpire, the players taking advantage of their fellow men.

Kurfess pitched the winning ball all the way, but Chapman was pounced on and with the errors behind him was a loser from the start. In the seventh Lemieux sent in Crum to pitch, and he did very well, only seven men facing him in the remaining two sessions. The box score:

Moose Jaw.

	AB.	R.	H.	PO.	A.	E.
Yohe, 3b	4	1	1	0	4	0
Million, lf	3	1	0	1	0	0

Totals	31	1	5	24	10	6

Score by innings—

Moose Jaw	104 011 00x—7
Edmonton	000 000 100—1

Summary: Stolen bases, Yohe, Wally Oday and Weed; sacrifice flies, Million, Lemieux; two base hits, Fortier, Whisman; three base hits, Yohe, Kurfess; pitchers' summary, 6 hits and 7 runs off Chapman in 6 innings; 1 hit and no runs off Crum in 2 innings; bases on balls, off Chapman, 1; off Kurfess, 2; struck out by Chapman, 2; by Kurfess, 3; first on errors, Moose Jaw, 4; Edmonton, 2; wild throws, Fortier, Lemieux, Povey and Augustus; wild pitch, Chapman; double play, Oday to Augustus to Price; left on bases, Moose Jaw, 3; Edmonton, 6. Time of game, 2 hours. Umpires, Gregg and Seaton.

RED SOX GRAB FIRST GAME FROM HATTERS

Regina, July 11.—The Red Sox stopped the Mad Hatters in the first game of the local series last night, winning 4-2. Botorff held the visitors safe in all but the fifth, when hits were bunched for a pair of runs. Lind was hit hard throughout, but fast fielding kept down the score. Herriott made four hits in as many times at bat.

Score:

Medicine Hat	000 020 000	2	7	1
Regina	200 101 00x	4	11	2

Batteries—Lind and Bliss; Bottorff and Netzel.

French Champion Wins

Paris, July 11.—Charles Ledoux, bantamweight champion of France, last night defeated Eugene Criqui, also of France, in the twelfth round of a 20-round match. Criqui refused to respond to the call of time.

QUAKER ERRORS LOST GAME TO CALGARY BRONKS

Tail-enders Take 2 to 1 Score from League Leaders—Northrup Pitched Well

Saskatoon, July 11.—Errors of the worst type gave last night's game to Calgary, 2 to 1. It was the worst finish to a ball game seen here this season. Northrup pitched a wonderful game, and until the last inning held the Bronchos to three scratch hits. He was opposed by Frink, who was touched for seven safeties. In the ninth Jones singled. Piper hit to Lorenz, who, in trying for a double play, dropped the ball. Streib hit back to Northrup, who threw to Chick to catch Jones at third, but Chick dropped the ball and the bases were filled with none out. Lemieux then flied to Harley, who made a beautiful throw to the plate, getting Jones. With two out and two on, Reams hit to left field, scoring Piper and Streib, and putting the game on ice.

The score:

Calgary	000 000 002	2	5	1
Saskatoon	000 001 000	1	7	3

Batteries—Frink and Jones; Northrup and Walters.

BILLIARD CHAMPS TO PLAY IN EAST

Part of Match Between Inman and Hoppe Will be Decided in Montreal

Montreal, Que., July 11th.—That part of the world's billiard championship match, between Hoppe and Inman will be played off in Montreal, is now certain. It will take place in October, and the games will in all probability be played on the 22nd, 23rd, 24th and 25th of that month, in the Windsor Hotel.

Promoter Benjamin, well known in connection with the big cricket tour last year, and other affairs of equal sporting magnitude, has the matter in hand.

The match will be divided into three parts. One part will be played in New York, one in Chicago, and one in Canada, and the one in Canada will be divided again amongst Montreal, Toronto and Winnipeg. 4,000 points being played in each city in games of 1,000 points each.

The men have a thousand dollars each on each match of twelve thousand points, and an extra thousand on the rubber.

It is more than likely that Inman will do most of his practising before the series in Montreal. The games will be divided in contests in English and French billiards, the latter being equal to the American game

Old Country Cricket

London, July 11.—Yorkshire beat Northamptonshire today by an innings and eight runs. The high scorers for Yorkshire were: Rhodes, 59; Kilner, 79 and Oldroyd 51.

Kent beat Somerset by nine wickets. The high scorers were: Poyntz, of Somerset, who made 51, not out, and Hubble, of Kent, who made 115.

TWO GREAT CATCHERS IN THE AMERICAN LEAGUE

On the right: Catcher Shang of the Philadelphia Americans who yesterday worked in the eleven inning tie game against Detroit Tigers. On the left: Catcher Schalk of the Chicago American league team. He worked yesterday against Boston.

Scott Batted Hard

Boston, July 11.—(American) Boston landed hard on Scott in the fifth inning yesterday and defeated Chicago, 5 to 1. Johnson, who started in the box for Boston, was hit on the elbow by a fast pitched ball in the fifth and had to retire.

MAURICE M'LOUGHLIN'S STYLE IS MOST FREAKISH IN TENNIS

Succeeds at Slam Bang Type of Game Because He Has Tremendous Vital and Nervous Energy—Not Equal of Wilding.

New Yory, July 11th.—Eastern tennis officials are reported to be advocating the "slambang" tennis style, as the only one that can upset the "parlor" or English system of systematic play in the coming Davis trophy contests.

This idea is gaining ground, owing to the success of the sis-boom-ah! stuff used by Maurice McLoughlin. Because McLoughlin puts it over, the tennis world argues that it must be THE style.

From analysis of accounts of McLoughlin's style, it has been made plain that his main strength tennis wins, not of itself, but BECAUSE HE HAS THE PHYSICAL POWER TO MAINTAIN IT THROUGH A LONG MATCH.

It would be pitiful to watch the efforts of imitators of McLoughlin who lacked his powerful heart and stamina. McLoughlin seems to batter his way through because along with some very good tennis, he apparently has tremendous vital and nervous energy.

Saddle his tactics on an unsuited physical equipment and you make matters worse. Every player must be developed along the lines toward which his physique and temperament tend. You can't make a weight man of a sprinter, nor a 100-yard dash lad out of a five-mile runner.

McLoughlin's style is beatable, even when he's at his best. And australia is sending over the boy that can do it—and HAS TWICE DONE IT—Anthony F. Wilding. Competent critics say that McLoughlin's style is faulty; he's weak on ground balls and has at times a defective service that causes him to fault.

Cool, steady, accurate play by both Wilding and Parke, of England, have trimmed McLoughlin, cooling his fire effectually.

For the average man, cool play will go further than Mc Loughlinisms. The Californian seems to be a freak player, not an advance agent of a new tennis style.

Three in Succession

Pittsburg, July 11.—(National) Philadelphia defeated Pittsburg yesterday for the third time in succession, the score being 5 to 2.

MORAN VS. WELLS: LONDON FIGHT MAD

London, July 11.—Dan McKetrick today closed verbally a deal for Frank Moran to meet Bombardier Wells for a purse of $25,000. Young Ahearn, it is said, will sign to fight both Carpentier and Smith, if the fight between this pair results in a draw, in which event the purse, instead of being $30,000, will be increased to $50,000 for both contests. London certainly is fight mad.

SMITH VS. CARPENTIER NEXT THURSDAY NIGHT

London, July 11—Tremendous interest in being taken in the Smith-Carpentier fight for next Thursday night at the Olympia. The advance sale is now exceeding $45,000, against $21,000 for Welsh and Ritchie and the management expects the gate to exceed $60,000.

MIDDLEWEIGHT TITLE FAR FROM DECISION

No Boxer in Game Has Clear Right to Championship, and About Six Men Can Be Considered in Hunt—Murray Comes Along and Beats McCoy.

Some kind promoter ought to untangle the kinks in the middle-weight fight championship situation. There is no boxer in the game who has a clear right to the title.

Chip never really deserved it, because Klaus, whom Chip defeated, derived his claim from a victory over Billy Papke, who inherited the title from Stanley Ketchel.

But others than Klaus had beaten Papke, and before the Pittsburger got to him, so Klaus was not really entitled to the ghost of a show. McCoy accidentally hung one on Chip in a no-decision bout and grabbed the laurel wreath then and there and tried to beat it. But along comes Billy Murray, of the coast, and trims him, but gets no decision.

Now, today, there are half a dozen men with the real title look-in—they are: Eddie McGoorty, George Chip, Jimmy Clabby, Al McCoy, Billy Murray and Jack Dillon.

Eventually it will probably be found that McGoorty and Chip are the best of the outfit; but at present there's no way of being sure which is which.

Tom McCarey of Los Angeles, has endeavoured to straighten out several titles. This looks like the best chance to promote a real title tournament that has yet bobbed up.

Three Straight for St. Louis

St. Louis, July 11—(National) Dolan's ability to hit Demaree's curve ball, while Perritt was pitching air-tight ball gave St. Louis its third successive victory over New York 2 to 0.

RESOLUTE TAKES SECOND TRIAL IN FAST TIME

Vanitie and Defiance are Sadly Distanced in 30 Mile Yacht Race.

Newport, R.I., July 11.—In typical Sandy Hook racing conditions, a long, greasy roll and faint airs, the Resolute so completely outsailed her rivals yesterday that she led the Vanitie three miles and the Defiance four and a half miles at the finish of their thirty-mile contest. The Defiance was so far behind that she quit racing as the Vanitie crossed the line, although the committee waited a few minutes for her to reconsider.

The Resolute's margin in elapsed time over the Vanitie was 31 minutes and 21 seconds, which her time allowance increased to 33 minutes and seven seconds in corrected time.

The race was the second of the trials and the first under the direction of the New York Yacht club.

SEATTLE TO GET INTO COAST HOCKEY LEAGUE

Seattle, Wash., July 11.—Unless all signs fail Seattle will be a member of the Pacific Coast Hockey League next season. Frank A. Patrick, who with his brother Lester controll the professional game at the coast, has filed with the county auditor the lease from Watson C. Squire for a large tract of land. This property which cost $35,000, will be used for an artificial ice skating and hockey rink.

Speaking of hockey Patrick said:

"The game will go here, I know, and it is only a matter of time when the whole Pacific coast will take up the sport. Hockey is the most exciting sport in the world, and I am sure that Northwest sports will appreciate it."

Patrick plans to erect a fine arena here. He expects to complete the building by next fall, and work will start immediately.

The coming of the rink here probably means that Seattle will be a member of the Pacific Coast Hockey League next season. It has been stated that in case it was decided to erect a rink here, Seattle would replace New Westminster in the league. However, this will not be determined until the annual meeting in October.

"However, I have no doubt but that Seattle will join the league," Patrick said, "whether it is New Westminster that drops ont or another club added. We intend to make the Northwest a stronghold of the game.

"An ice hockey rink requires the spending of a great amount of money, and it is very difficult to keep in condition. However, the management expects to pay for the rink and for the upkeep by the admission money to the league games. It is the custom to see thousands of fans present at a game of hockey in Canada, and it is very probable that it will draw here just as well."

CHANCE MAKES RICHIE PAY BROWN FOR DOING WORK AFTER NIGHT OUT

Frank Chance believes the best way to make a ball player behave is to take his money. Consequently, when he hands out a fine the fine sticks.

Lew Richie once tried to put one over on Chance. Lew went to bed early and took care to have Chance see him retire. When all was quiet he left the hotel, returning late.

Chance discovered what Richie had done. The next day he sent him to the mound. Richie lasted only a few innings and Miner Brown had to work hard to save the game.

Chance told Richie why he had picked him to pitch and fined him $100.

I'll give Brownie $50 for doing your work and keep $50 myself," he said.

A few days later Brown wanted to give Richie his share of the fine, but Chance threatened to fine Brown $50 if he did.

ORGANIZED BALL PAYS $1,000,000 FOR WINE PARTY

Beverage Makes Herrmann Forget Promise and Gives Feis a Start

Garry Herrmann, boss of the Cincinnati Reds, is the owner of the questionable distinction of having purchased the most expensive wine in the history of the world. The original outlay for the three or four quarts of extra dry that he bought at the Waldorf on December 12, 1913, was only $15 or $20, but since then it has cost Garry an extra $50,000 or so and cost his colleagues in organized baseball something like $1,000,000. And, as they say in classical Boston, "The end ain't yet."

It seems an exaggeration to say that the success of the Federal league is due in a large measure to those three or four quarts of champagne. But one has to go quite a distance sometimes and make some real startling statements when relating real unvarnished facts.

The Federal league was a puny upstart organization in December, '13. No one gave it much thought. It had only George Stovall and one or two other players under contract who were of real major league caliber, and it had only a few backers with real bankrolls. The future looked drab and drear like and even cold-hearted Ezra Gillmore and his few trusty lieutenants were downcast.

And then Garry invested in wine, and while in wine he sold Joe Tinker, the shortstopping person, to Charles Holiday Ebbets of Brooklyn, using the wine-smeared table as the place for "pulling off" the most famous deal in baseball.

Ebbets After Publicity

And then incidents began to happen. Ebbets, the best little publicity gatherer since Nero's time, at once began to get into newspaper debates with Tinker. He could have signed up Tinker right away and saved him to organized baseball, but that wasn't Ebbets' idea. Furthermore, neither he nor any one else ever figured on Joe doing such a traitorous act as jumping to the Feds. The idea was so absurd, so ridiculous, etc., that it wasn't even thought of.

And so Charley just went along on his serene publicity gathering way and reaped reams of press agenting through the fact that he'd agreed to pay the then unheard of price of $25,000 for one ball player. Joe wanted to sign up and gather unto himself that $10,000 bonus. But Charley didn't want the signing up done right away. The longer Joe remained unsigned and the longer he could get the newspapers to speculate on what would be the outcome of the little newspaper argument he and Joe were having on the salary question, the better it would be for Charles, who figured that Joe would prove a greater drawing card for each day that he was kept out in the cold, begging for that $10,000 bonus.

All of a sudden Joe startled the baseball world by jumping to the Federals. And the Federals were made. It was the turning point. The acquisition of Tinker gave them the most advertised man in baseball. It gave them a wonderful player, a wonderful drawing card—and it gave them courage. And too,—and the most important of all—it influenced new capital and influenced other major league stars to their ranks.

SHAMROCK IV. WILL HAVE A BIG SEND-OFF

Portsmouth, Eng., July 11.—When Shamrock IV. starts on her trans-Atlantic voyage on July 18 she will have a send-off from the biggest naval force assembled. King George on that day will inspect more than 200 British warships lined up at Spithead.

The cup challenger has been taken into drydock here after having her racing mast replaced by two masts for the ketch rig. She will be cleaned, painted, strengthened and padded in preparation for the voyage.

NOW WELSH'S TURN GRAB EASY MONEY

Is Right After Music Hall Engagements—Ritchie Returns July 25

London, July 11.—Willie Ritchie starts this morning for a trip to Paris and through Germany, and has booked passage for home on the Vaterland, July 23. He hopes to arrange matches with half a dozen of the most promising on the list of lightweights in America, within the next nine months, and would, if public opinion insisted, return for another contest with Welsh.

Ritchie says he is sorry if anyone misconstrued his astonishment at the referee's decision as "beef." He says he is perfectly willing to let the American newspaper men express their own opinions after they have seen the pictures.

Welsh is returning tomorrow to Cardiff where he will spend a fortnight. After being lionized by his admirers, he will return to London to get some music hall money.

The Bay Beat Swifts.

A football surprise was sprung last night at the old exhibition grounds, when the Hudson's Bay team, greatly strengthened over last week's team, competed with Swift's senior team, not the regular line-up and defeated them 1 to nil. The game was a good one, and on the events play the Bay deserved their win. There is no doubt but that the North Edmonton team under-estimated their opponents, but that is no fault of the boys from the big store.

Referee Foster, who was the evening's official, lined the teams up as follows:

Swifts—Goal, Manley; backs, Bowater and Finlay; half-backs, Pendergast, McCurdy and Holland; forwards, Finlay, Grieve, Cuff, Glossop and Lessenden.

Hudson's Bay—Goal, Stone; backs, Walker and McNeil; half-backs, McDiarmid, Seaton and White; forwards, Adams, Christie, Crockett, Briscoe and Kew.

All Stars vs. Rest of League.

On Wednesday, July 15, the Edmonton All Stars will play the team selected from the balance of the league, at Diamond park. This is in the form of a practice for the All Stars who are to play the Calgary team on the 25th, in the first of the inter-city games. These games, as usual, are the big soccer games of the year and greater interest than ever is being shown this year.

Following are the teams as they will line up for the practice game on the 15th:

Edmonton All Stars—Stockton; J. Kinsman and S. Whitehead; W. McPherson, W. Whitehead and W. McIntosh; A. Collier, E. Sonner, J. Tweedale, W. Dickie and W. Jewell.

Rest of the league—M. Kirton; W. Pratt and D. Baker; T. Eastham, J. Kelsall and M. Cowan; C. Hornsby, S. Bradford, A. Spence, G. Coward and W. Davidson. Reserves, Ockenden, Lamb, McCardie and W. Cuff.

GUN CLUB SCORES.

The merchandise shoot at the traps of the Northern Club Gun club this afternoon promises to be one of the biggest shoots of the season as many members from each of the local clubs will be on hand in a try for the prizes. Another competition on the boards is for the Martin trophy which is a five man event, highest scores being counted. The Greater Edmonton Gun club are making a great effort to lift the silverware and some high scores should result. The tournament will commence at 2 o'clock sharp, and the following prizes will be donated to winners.

One box candy, by J. and J. Candy company.

Two ties, by Benson, Crabbs and Foster.

One pair shooting glasses, by W. A. Mores and C. J. Kirk.

Pearl handled pocket knife, McMann and Kost.

Gun case, McLaren sports goods company.

Shell case, Marshall Wells Alberta company.

One quart liquor, G. M. Cowderoy, company.

One quart liquor, G. M. Cowerоy.

100 Dominion shells, Canadian Explosives.

The following are the scores made at the Thursday shoot of the Northern Club Gun club:

	Shot at	Broke
H. J. Crabbs	50	46
G. M. Cowderoy	50	46
E. L. Kost	50	45
C. J. Kirk	50	45
C. Stanford	50	45
T. J. McMann	50	43
W. A. Michael	50	42
E. L. Sonner	75	57
K. Blackett	75	52
W. T. Matthews	75	42
Court May	75	32
J. Oldfin	75	28

MAJOR LEAGUE RESULTS

Juul Was Wild

Brooklyn, July 11.—(Federal) Knetzer was as effective as Juul was wild yesterday, Juul issuing eight passes and allowed seven hits in eight innings. Knetzer struck out seven locals.

Buffalo Shut-Out

Baltimore, July 11.—(Federal) Baltimore shut out Buffalo yesterday, 4 to 0. Suggs pitched a masterly game, two singles, two bases on balls and a hit batter affording the visitors their only opportunity to get on the bases.

Chicago Bunched Hits

Chicago, July 11.—(National) Chicago gained on New York yesterday, defeating Boston, 11 to 6, while New York lost to St. Louis. The locals secured their runs by bunching hits. The hitting of Schulte and a triple by Lavender with the bases filled, featured the game.

Clarke Split His Hand

Cincinnati, July 11.—(National) Brooklyn batted hard yesterday and easily won from Cincinnati, 11 to 6. Clarke had his hand split by a foul ball and will be out of the game for some time.

Walter Johnson Pitched

Washington, July 11.—(American) Washington pounded out 15 hits off four St. Louis pitchers yesterday, winning 8 to 4, and evening up the series. For Washington, Johnson pitched the first five innings and Harper finished the game.

Three Out of Four

New York, July 11.—(American) New York made it three out of four from Cleveland by splitting even on a double header yesterday. Cleveland won the first game by hitting Warhop hard, while Gregg who was knocked out of the box yesterday, came back in great style, Cleveland winning, 7 to 1.

Hagerman held New York to an infield hit in the second but that hit beat him. Hartzell walked to start the third inning and stole second. The next two men were easy outs but Hartzell scored when Mullen got an infield single over second, being helped by LaJoie's poor throw to the plate.

Eleven Inning Tie

Philadelphia, July 11.—(American) Philadelphia and Detroit battled 11 innings here yesterday when Umpire Hill stopped the play on account of darkness with the score tied at 8 runs. The home team knocked Cavel off in three innings and had a lead of five runs when Detroit rallied in the eighth by mixing hits off Pennock and Bender with errors and scored six runs. The visitors increased their lead by two runs at Wyckoff's expense in the ninth.

The heavy beard of the outdoor man, "sun-cured" and wiry, is the "acid test" of a razor—and here it is that the

Gillette Safety Razor

most clearly shows its "class". Wherever a man may choose to use it, afloat or ashore, the Gillette gives a clean, cool, comfortable shave, without pulling, gashing, or even irritating the skin.

Be sure your vacation outfit includes a Gillette Safety Razor. It will save your face and temper, and help you to keep clean and respectable wherever the trail may lead.

Your Hardware Dealer, Druggist or Jeweler will gladly show you a wide range of Gillettes—Standard Sets at $5.00—Pocket Editions at $5.00 to $6.00—Combination Sets from $6.50 to $25.00.

Welsh and Duffy

Freddie Welsh fought Jimmie Duffy, a no-decision bout at Buffalo on May 22, 1912—

Duffy also had the better of a no-decision bout in Buffalo last winter, according to newspaper decision.

There records for 1913 were:

	Fights Won	Lost, No D.	Dw.
Welsh	15	2	0
Duffy	14	3	0
	11	3	0
	11	0	0

American Aviator First

Paris, July 11.—Walter L. Brock, the American aviator, was the first of the contestants in the international aviation race to arrive at the Buc Aerodrome. He landed at 18 minutes past 11. Lord John Carberry was second at 12:04 p.m. and Raoul Garros, third at 12:10.

Brock's flying time from London to Paris was three hours, 33 minutes; Carberry's three hours, 52 minutes and Garros four hours, five minutes.

Brock started on his return journey to London at 1:18 p.m.

About Your Own Vigor

Sent Free to Men

MR. READER:

Here is something I have to of fer you absolutely for nothing—a little private book of special information about the legitimate uses and unnatural abuses of manly vigor, about the preservation of manly strength and its possible self-restoration; and illustrated pocket compendium of 8,000 words, 72 pages and 30 half-tone photograph reproductions—which I am very pleased to send by mail, absolutely free of charge, in a plain, sealed envelope, to any man, young or elderly, single or married, who writes for it.

Over a million of these books have been thus sent to applicants all over the world since my free offer first appeared. Publishers are charging as much as $2 for books on sex subjects, while my book is free. Therefore, readers, if you would like a great fund of

Inside information relating directly to the subject of manly vigor, all put in perfectly plain, easy-to-read language, with many hints that you can surely apply to your own self no matter how strong you may be, or how nervous or rundown you may feel, if you want to know the facts about this particular subject, given to you without a single scare, then fill in the coupon below, send to me and receive my book, sealed, by return mail. In one part of this little publication I describe a mechanical invention of my own, which I call the SANDEN Vitalizer, something you wear at night as an aid to the restoration of lost or waning strength; but you are not expected to get one of these appliances unless you decide for yourself that you want one. The book is complete, and there is absolutely nothing you are required to buy or pay, either now or in the future. Therefore, please send your name and address today. SANDEN, Author.

MANHOOD! The quality which rules the world today. My friend, there never was a time in the history of the human race when real, sturdy manhood, manly vigor and manly courage counted for as much as they do now, this very minute. No matter what your years, whether you are 20 or 60, you must be either entirely in the race or entirely out of it. It is invariably the fellow who prizes up the strongest in this human strength that forges to the front; while weaklings stand aside. It is he, also, who is in most demand and most sought after by women and men of his community, simply because he radiates that marvellous magnetic influence which tells an abundant vigor and rugged manly health can radiate.

MANHOOD WINS IN ALL WALKS OF LIFE

believe any man can hope to complete ly develop or restore this same vigor or manly strength, no matter what his past follies may have been, provided he is willing to REALLY MAKE THE EFFORT; and provided, of course, he is not weighed down by extreme old age or is not incurably diseased. To my mind, the road of the one who wants more vigor is perfectly plain, but if it a road that any man MUST travel if he attains the highest ideals in respect to his own manhood. See information in my free book.

As to the SANDEN Vitalizer, previously mentioned, will say it is a little mechanical appliance, weighing but a few ounces, which you wear at night. This Vitalizer generates and sends forth a certain soft, penetrating force which I call Vitality. It apparently drives this Vitality into your nerves, blood, muscles and organs as you sleep. It is quieting to the nervous system—or, at least, so users say. Men write that it takes pain out of the back and restores vitality in 90 days. Remember, the general information of the free book is independent of this Vitalizer, and you are not expected to get one of these little appliances unless you want to. You can write me later as to that if you so desire. With special attachments, my Vitalizer is used by women as well as men for rheumatism, kidney, liver, stomach, bladder disorders, etc. If you live in or near this city I should be most pleased to have you call in person at my office, where you may see and test the Vitalizer free of charge. Hours—9 to 6; Sundays, 10 to 1. Or if inconvenient to call, do not fail to write for the free booklet.

To Get Free Book Please Use Coupon

If you live too far to call, or if you cannot call, please fill in the coupon below and send it to me. You will receive free, sealed, by return mail, my 72-page illustrated book, containing 8,000 words, a complete compendium of useful information for men, young or elderly, single or married, who want the truth about the subject of vital strength, its preservation, its possible self-restoration, and its legitimate uses and wanton abuses. You get it all free.

THE A. W. SANDEN CO., 140 Yonge St., Toronto, Ont.
Dear Sirs—Please forward me your book, as advertised, free, sealed.

AUTOMOBILE NEWS

UNPUNCTURABLE TUBE IS LATEST THING FOR AUTO

New Edmonton Accessory firm Has Agency for Self-Closing Inner Tire

WILL ALSO HANDLE HENDERSON MOTOR

Manager Cherry Chooses Edmonton—Experience in English and French Factory

An unpuncturable tube—or at least one that closes itself up when cut—is one of the latest things in the automobile world. This is one of the many lines of automobile accessories handled by the Western Automobile Accessory company, which has just opened commodious and up-to-date quarters in the rear of the Allan block, corner of Namayo and Isabella.

One of the firm's representatives blew up one of these tubes in front of a Capital reporter today and then calmly pushed a blade through it as if seeking to wantonly destroy as much as possible. However, the tube did not immediately lose all its air and become flat, but by some method seemed to sew itself up automatically. There is apparently something about the quality and construction of the rubber which closes up a hole in much the same manner as a valve opens up to take in air and immediately closes to hold it in. This remarkable tube is guaranteed to wear out three outer cases.

The new quarters of this firm are splendidly suited to such a business as that of dealing in automobile accessories. All round the building is asphalt paving and in front the latest patent sidewalk gasoline pump, also air pump accommodation.

At the back is a room which is to be fitted up into a workshop and small repair shop.

One of the automobile parts for which the firm has secured the local agency is the Russian tire, which is guaranteed to run 5,000 miles. It has given very good satisfaction in the east. Many other accessories, some new, some tried and reliable will be handled, and a considerable stock is already on hand.

Ernest E. Cherry, the manager of

ERNEST E. CHERRY

Manager Western Automobile Accessory Coompapn, Allan Block, Namaye Avenue.

the Western Automobile Accessory company, has had a wide experience in the automobile and automobile accessory business, in France, England and eastern Canada. He came to Edmonton from Toronto and considers this city the most promising in all the west for such a business as he is opening up.

Mr. Cherry stated today that he contemplated securing the agency for next year's Henderson auto. The Henderson is made in Indianapolis and Mr. Cherry says that it combines many unique features not found in most other cars—wire wheels for instance. There are no machines of this make in Edmonton at the present time. It is a five-passenger car, made in either four or six-cylinder models.

The idea that there is no particular care necessary for the successful operation of a car, aside from filling the tanks and radiator is erroneous. There is no more carefully designed mechanism in existence, and as is usually the case with all complicated machines, careful inspection and attention to details will prolong its life and insure successful operation to an immeasurable degree.

A new motorcycle club has been formed at Hibbing, Minn.

AUTOISTS SHOULD WATCH THEIR OIL

Lubricating Systems Need Careful Attention, Especially in Hot Months.

"When making long tours these hot summer days trouble is experienced with overheating," writes an eastern branch manager.

"The driver is at a loss to know where to look for the source of the trouble. With the prevalent use of the water pump in the circulating system overheating in the majority of cases is not due to poor circulation of the water, but to faulty lubrication.

"It is interesting to note that the winning car at the Indianapolis 500-mile race averaged 82.47 miles an hour on two gallons of lubricating oil, while another car which finished near the end used 35 gallons of oil. It is impossible, of course, to use such a quantity of oil effectually in a motor traveling 500 miles, but the striking contrast of the conditions shown by the race indicates clearly the importance that must be paid to the lubricating system of the car.

"The theory of lubrication is that a film of oil separates the metallic surfaces and takes the wear, but if the oil becomes too thin it is forced out of the bearing too readily and the metallic surfaces come into immediate contact and are rapidly worn away. It is not enough to apply the lubricant indiscriminately to the various chassis parts. It must be done systematically and logically to obtain the best results and insure the economical use of the lubricant. The engine is but one part in the car that must be properly oiled at all times. It should be a self-evident fact that a heavier oil is required in summer than in winter.

"When the oil in the crank case becomes black and thin from the products of wear it has lost its lubricating properties, and it is true economy to throw it away and use a supply of clean oil.

"The transmission case should be filled with a good grade of heavy cylinder oil—not heavy grease—at this time of the year. The rear axle differential housing should be filled with a light mineral grease having the consistency of vaseline. Light oils should never be used in either the transmission case or the differential housing, because they will not stay in place nor cushion the gear teeth."

As the result of experience gained in this transcontinental trip Mr. Cidney advises light loading.

FADS AND FANCIES FOR MOTORISTS.

Pullman aprons for ladies are very popular for touring trips but not in leather. They are now made of heavy canvas or linen bound with black silk braid. They are fitted just the same as those of leather but do not take up as much room in the dressing bag.

* * *

"Tripping" suits that are modish in the extreme are being made of all black Cortez crepe. The skirt has the inverted pleat at the back, buttons down full length at the left of the front gore and has a stitched hem. The jacket is of Norfolk cut and the blouse is of black voile worn over a yellow underwaist. The trousers are of the same silk as the suit. Long, black suede boots, a black Stetson hat of becoming width of brim, a soft yellow scarf around the crown, and yellow chamois gloves complete the costume.

* * *

One of the new shapes in automobile dressing cases folds into a bag with long leather handles and unfastens so that it may be opened out almost flat. Black automobile leather with tan moire silk and with ivory fittings is a popular combination.

* * *

The latest novelty to be worn with linen touring suits is the white buckskin shoe, banded with old blue or green leather. White silk laces are used.

* * *

Leather tea boxes, though rather more expensive than those of willow, are gaining favor as the season advances. The box is square and has a strap handle at the top.

* * *

Young travelers now discard the short socks for touring and wear long black stockings and patent leather sandals or tan stockings and tan sandals, with dark blue or brown linen suits. The knickers and caps are of the same linen. The little girls use the belted beach coats and the boys the smart Cossack coats.

* * *

A new folding bookcase has a paper cutter, a ribbon place marker and an extra pocket to hold pencil and pad. It is of soft leather and may be had in several colors.

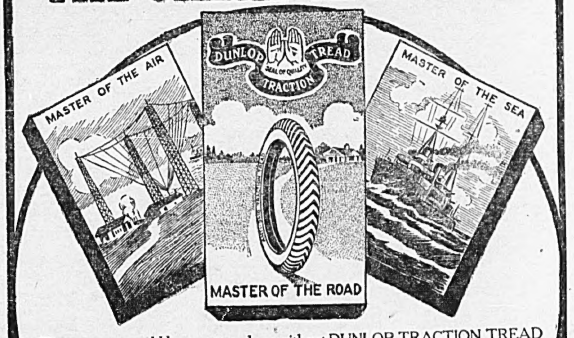
* * *

The Dutch oven is a three legged pot of polished iron with a deep sunken cover, on top of which coals may be laid. It is very deep so that bread may be baked and meat roasted in it. It has a bale, so is not hard to handle.

* * *

There is a pocket "kook kit" of aluminum which is compact and weighs only 36 ounces. It consists of broiler, pair of frying pans, double racks, narrow pot and two drinking cups, all of which may be nested into a small case.

THE GREAT MASTERS



The motor car could have gotten along without DUNLOP TRACTION TREAD —but not so well.

If DUNLOP TRACTION TREADS had not come into being, motorists would still be looking for protection from skidding; a tire that would never rim-cut; and that would adapt itself to every car, every load, because it had sixty-six cubic inches greater air capacity.

In the generality of causes, DUNLOP TRACTION TREAD has sold more cars than any other single source. Tires make or mar the pleasure of driving. A standardized safety-ensuring tire like DUNLOP TRACTION TREAD means auto prospects can be made to forget their anticipated fears about skidding, punctures, rim-cutting, and go ahead and buy the car.

T. 96

With the addition of a motorcycle to its equipment the board of public works, of Indianapolis, Ind., expects to be able to do much more effective work in enforcing the ordinances regarding clean streets and alleys. Heretofore the board has had to depend on policemen to investigate complaints whenever they could get time from their duties, and much delay has resulted. Now, with a motorcycle officer at its disposal, the board will make regular investigations of streets and alleys, and all complaints will be promptly taken care of.

The Akron (Ohio) Motorcycle club has started a campaign to boost its membership up to 200, which it expects to do by the middle of the summer.

Mrs. Frank Karslake, of Oakland, Cal., won the prize for the woman coming the farthest to the motorcycle day celebration at Sacramento, Cal. Mrs. Karslake rode her two-wheeler 130 miles to the meet.

Six new motorcycles have been ordered for the Malden (Mass.) police department.

Carl Fisher, owner of the speedway at Indianapolis, believes that for 1915 and succeeding years the cubic piston displacement limit for cars taking part in this biggest of national racing events will be 300 inches.

The first motorist to cross the American continent this season has arrived in Detroit.

The trip was made in a Studebaker over the Santa Fe trail. The tourist, O. J. Gidney, was accompanied by his wife and son.

Western Automobile Accessory House

ALLEN BLOCK, NAMAYO AVENUE

We have just opened a Motor Accessory House which is equipped with every modern device to supply the needs of Automobilists.

One of the leading features is the **BROWN SCIENTIFIC TUBE,** Non-deflating and pneumatic self closing when punctured. We have also procured the sole Agency for the **"PROWODNIK TYRES"** same being manufactured in Russia. This Tire is in the greatest demand in the East, and selling on its merits. Full particulars and Price List can be furnished on application.

We are also equipped with one of the latest patents **"GILBERT-BARKER" SIDE-WALK GASOLINE PUMPS** which will mean a great convenience to the Automobilists. **NO DELAY.**

Our Motto is quick service and courtesy combined with legitimate prices.

HOUSES WANTED

WE WANT SMALL HOUSES IN ALL parts of the city. Chubb Land Co., Phone 4949. E-C

FOR SALE—REAL ESTATE

LOT INSIDE ONE MILE CIRCLE, WATER and sewer, will trade for clear title ¼ Sec. Apply A. A. Howard, 31 Dominion Bank Bldg. Phone 6224.

FARMS FOR SALE

320 ACRES, 60 IN CROP, 18 MILES from Edmonton, close to P.O. and school; good house and buildings, $20 an acre. Apply Box 45 Daily Capital. S-PT

WIDOW HAS ¼ SECTION 4 MILES from Grassy Lake. S.E. ¼ Section 36-10-13. First class land. Farms adjoining held at $20. Will discount this liberally for cash. Address R. W. Mapps, Ripon, Wis. S-PR

SECTION 21-49-11-4—11 MILES FROM Innisfree on the C.N.R., and 18 miles from Viking on the Grand Trunk Pacific. The Lloydminster-Revelstoke line of the C.P.R. will give a town much nearer than either of these. This land is on the shore of Lake Alice, a deep and pretty body of water giving this property a mile of lake front. The lake cuts into the section, leaving 394 acres of the possible 640. The entire 394 acres lays in a body, is all fenced and cross-fenced, has 110 acres broken, no waste land, level, high and dry, no stones, one and one-half miles from school, and has a strong flow of water both summer and winter from a living spring. Price $14.50 per acre. An important consideration is the fact that it is possible to secure a homestead within five miles of this land, thus making it possible to prove up on 160 acres free of cost without occupying other than the farm above listed. P. M. Benzanson, ...enson Blk. Phone 1221. Alberta Homeseekers' Inv. Co. S-C

I HAVE ½ SECTION FARM LAND 60 miles from city, well improved, will trade for equity in house in Edmonton. Apply A. A. Howard, 31 Dominion Bank Bldg. Phone 6224.

FOR SALE—SPECIAL BARGAIN IN LAND Have ¼ section of land 5 miles from Holden, description, S.E. ½ 19-50-15-4. First class land, purchased under direction of land inspector; lands adjacent held at $16.00 per acre. Will sell at discount from above price. Dr. J. May, 4318 Gilbert St., Oakland, Cal. R-M

NOTICE—WILL TRADE TITLED FARM land city property for an automobile. We have clients for farm lands and solicit your listings. We want listings of Prince George property. Dagg & McNeely, 764 First street. Phone 6505. M-C

FARM FOR SALE—240 ACRES, 75 acres under cultivation, large pasture, all wire fenced; there is a large dwelling house, a frame stable and two granaries, good well; (farm is 2½ miles from city boundary); location unsurpassed. News of the Markets

Winnipeg Cattle

Winnipeg, July 11.—The demand for good killing cattle during the week has been fair, whether dry fed or off grass, if fat and prices have been high. Half fat kinds are a drug. Stockers and feeders are getting easier. Extra choice steers at 7.50 and 8.00; choice, 7.25 and 7.50; choice heifers, 6.75 and 7.25; fat cows, 6.50 and 6.75.

The hog market was strong and a good number of choice changed hands at 7.60 but this price is not expected to be maintained.

Chicago Grain

Chicago, July 11.—Skepticism of the reports of damage by black rust brought about a lowering of prices yesterday in wheat. The loss at the close was ½ to ⅝ under last night.

Notwithstanding that hot weather northwest and bullish cables gave wheat prices some strength at the start, selling pressure enlarged to an unusual extent and there was recided heaviness in consequence throughout the greater part of the day. The selling was much influenced by seemingly excellent assurance that unless the black rust spread rapidly within the next ten days the spring crop would be out of danger.

Exporters generally agreed that the European demand for wheat was much less urgent than heretofore and that foreign requirements were fairly well filled up for the present. It was said that export sales here totally 500,000 bushels were doubtless included in the 800,000 bushels noted at the seaboard as the day's export.

Brisk cash demand lifted the price of oats. Shorts covered freely.

Chicago Cattle.

Chicago, July 11.—Cattle—Receipts, 2,500, market steady; Beeves, 7.60, to 9.75; Texas steers, 6.40 to 8.80; stockers and feeders, 5.75 to 8.00; cows and heifers, 6.75 to 9.00; calves, 7.50 to 10.85.

Hogs — Receipts, t10,000, market steady; light, 8.45 to 8.85; mixed, 8.35 to 8.25; heavy, 8.20 to 8.25; rough, 8.20 to 8.25; bluk of sales, 8.50 to 8.80.

Sheep—Receipts, 1,200, steady; native, 5.35 to 6.25; yearlings, 6.00 to 7.50. Lambs—native, 6.50 to 9.35.

Montreal Produce.

Montreal, July 11.—Butter is quiet and steady. Cheese more active, there being a better demand from over the cable at higher prices. Eggs firmer under a fair demand.

Cheese, finest westerns, 13 to 13⅛; finest easterns, 12½ to 12⅝.

Butter, choice creamery 23½ to 23¾; seconds, 23.

Eggs, fresh 23 to 24; selected, 26 to 27; 1 stock, 23; 2 stock, 20 to 21.

Pork, heavy Canada short mess, barrels, 45 pieces, 29; short cut backs, barrels, 45 to 55 pieces, 28½.

Montreal Stocks

Montreal, July 11.—Sharp declines in the Internationals, C. P. R. and Brazilian in London and a weak market in New York checked any bullish enthusiasm in local stocks yesterday and the general tendency was downward. On the whole the disturbance so far as it affected purely domestic issues, was slight. A fall of nearly four points in C. P. R. and of 2⅜ in Brazilian was accompanied by a decline of only one in Power, the most prominent stock in the recent advance, while losses elsewhere were confined largely to small fractions. The exceptions in that respect were Laurentide which fell 2⅜, losing about what it had gained yesterday, and Tramway and Power, which fell 1⅛ in the unlisted department.

Toronto Stocks.

Toronto, July 11.—The local share market is still in the rut. There was more liquidation in Brazilian and Barcelona, selling being encouraged by the weakness in London. The drop of 3 points in C.P.R. was in sympathy with the lower prices for the stock in New York. There was a report here that the verdict would be unfavorable to the company in the Empress of Ireland disaster.

New York Stocks.

New York, July 11.—Investment issues yesterday began to show the cumulative effect of the continued heavy selling of Gould issues, as well as various other low-priced securities. These and other stocks and bonds established new low records. The declines in New Haven and Chesapeake were noteworthy because they savored strongly of liquidation.

An unusual feature was the recording of many sales of minor international railroad stocks for future delivery. The fact that these sales were "flat," or without interest pending actual delivery, indicated that foreign holders were pressing the sale of American securities. Much of this class of trading was traced to Amsterdam, but London, Berlin and Paris also sold, altogether to the extent of about 25,000 shares.

New York Metals.

New York, July 11.—Copper quiet. Spot and September, 13.40 at 13.50; electrolytic 13.75 at 13.87; lake, nominal; castings, 13.62. London, easy; spot¼ £61, 5s.; futures, £61, 15s.

Tin—Steady; spot, 32.25 to 32.45; September, 32.40 to 32.80. London, easy, spot, £146, 10s.; futures, £148.

Lead—Quiet, 6.85 to 3.95. London, £19, 10s.

Spelter—Steady, 4.95 to 5.05. London, £21, 10s.

Iron—Quiet and unchanged; Cleveland warrants in London, 51s.; 4 1-2d.

Bar silver, 55 3-4.

London Stocks.

London, July 11.—Prices in the stock market here yesterday were generally lower and movements were confined to a narrow range on the more critical aspect of the Ulster situation which has an unfavorable infuence upon Consols and other home stocks. Money fas firmer and that too affected the market adversely, while settlement liquidation was heavy. Consols closed at 75 5-8 for money at that price being lower by 1 16 and were 75 11-16 or the account. Other high grade investments were down for the same reasons.

Canadian railway issues were prominently weak. Grand Trunks were sold again on renewed fears as to the affect of the speculative position and likelihood of an outburst of liquidation failing improvement. The crop position, too, is growing less favorable, is judged to menace the dividend prospects. The second preference stock of the company fell no less than three points. The weekly earnings statement was better than expected but was ignored in view of the other factors. Canadian Pacific had a heavy slump.

LOCAL MARKETS.

The prices were as follows for the different lines of produce:

Meats—		
Beef, per lb.	9	to 12
Roasts	12	to 12½

Cattle—		
Good fat steers, 1100 lbs. and up, must be choice	6½	to 6¾
Good fat steers, 1000 to 1100 lbs	5	to 6
Good fat heifers, 900 to 1000	4½	to 5
Good fat heifers, 1000 lbs up	5	to 5½
Good fat cows, 900 to 1000 lbs.	4	to 4½
Medium fat cows, 900 lbs. and under	3	to 3½
Good bulls and stags	3	to 3¼
Oxen—		
Choice fat oxen	3½	to 4½
Fair to good	3	to 3½
Common oxen	2½	to 3
Calves—		
Choice calves, 150 to 200 lbs.	7	to 8
Choice calves 250 lbs. and up	5½	to 6
Sheep and lambs—		
Choice sheep	5½	to 6
Choice lambs	6	to 7

Particular attention is called to the change in the classification of hogs, not the changes in the prices, but the change in the wording of the grading.

Gainer's Prices

Live stock weighed off cars at Gainer's abattoir, Strathcona, this week:

Extra fat steers, 900 to 1200 lbs. each, per lb. ... 6½c
Extra heifers, 700 to 1200 lbs, each per lb. ... 6c
Extra fat smooth cows, 900 to 1200 lbs, each, per lb. ... 5½c
Good fat cattle, ½c under the above prices.
Medium fat cattle, 1 and 1½c under the above prices.
Selected hogs, 150 to 250 lbs. each per lb. ... 6¾c
Heavy hogs and rough sows, per lb. ... ¼ to 2½c under 6¾c
Fat last year's lambs, over 75 lbs., each, per lb. ... 6½ to 7c
Light hogs, 100 to 150 lbs., each 6¼c

Electric refrigerating systems are now being installed in florists' shops to keep flowers in cold storage until sold.

ROSALIE CHALIA UNABLE TO PAY DEBT, SHE SAYS

New York, July 11.—Rosalie Chalia, of 45 East 30th street, formerly a grand opera soprano at the Metropolitan Opera House, was examined in supplementary proceedings by Attorney Robert D. Ireland, and said that she has been dependent for some time upon funds received from friends in Cuba and Mexico and upon small amounts earned by giving singing lessons.

Miss Chalie was sued by Aime Dupont for pictures he made of Miss Chalia prior to March, 1913. Subsequently she was unable to pay him, and he obtained judgment for $183.

Shanghai recently saw the opening of the first street car system financed, constructed and operated solely by Chinese.

Cleveland has appointed a woman police officer to patrol parks.

Notice

Notice is hereby given that pursuant to Part XI., Section 506 of the Edmonton Charter, the Municipal Council of the City of Edmonton proposes to pass a By-law for the closing of a certain highway in the said City of Edmonton, said highway being that part of the East and West line in Block 145 Garneau, as said lane is shown on Plan 8559-AH, that lies between the easterly limit of 110th Street and the westerly limit of the lane West of 109th Street as said last mentioned lane is shown on Plan 5000-AQ, both of said plans being of record in the Land Titles Office for the North Alberta Land Registration District; and for the selling, leasing or holding of the same as the Municipal Council of the said City may deem meet.

DATED at Edmonton, this 8th day of July A.D., 1914.

Signed,
CHAS. ED. K. COX,
City Clerk.
